Sub-Committee of the Commission Cives Out a Statement to Correct Misunderstandings-Long Afternoon Conference Held-Individual Operators Say They Will Insist Upon Being Considered-Commission Adjourns Until Dec.

3 to Await Progress of Negotiations.

SCRANTON, Pa., Nov. 22.-The members of the Anthracite Strike Commission do not mean to be done out of their desire to participate in the final settlement of the difficulties between the coal mine operators and their employees. They do not intend to leave any doubt in the minds of the public in this regard, as was shown by a statement of a sub-committee of the commission, Messrs. Parker, Watkins and Clark, issued at the Hotel Jermyn late this afternoon. The statement says:

SCRANTON, Pa., Nov. 22. It appears that there is some misunderstanding or some lack of understanding in connec-tion with the recess taken by the commission upon some of the important points involved. The recess was desired by counsel for both sides because authoritative statements of hours and wages which are being prepared are not as yet ready.

The suggestion was made that perhaps some agreement might be reached between problem and assist in reaching proper concommission, stated that the commission would gladly coefficients as far as could consistently be done, in furthering an effort to reach an understanding through conciliatory means

ing any misunderstanding which might exist the sub-committee of the commission in-vited such of the course! representing the coveral interests involved as could be reached to meet this afternoon.

This statement followed a two-hours' conference at Hotel Jermyn between the three members of the commission referred to and all the attorneys interested in the business before the commission who remained in the city. This conference was called by the committee of the Co missioners and was mainly for the purpose of letting the attorneys know the

attitude of the commission in the premises. The statements in the morning newspapers, to the effect that the troubles letween the miners and the operators may now be settled without an appeal to the good offices of the commission are responsible for the conference this afternoon. Mr. Watkins frankly admitted this in the presence of the other members while chat-

t'ng with the newspaper men. This, too, is the reason why the attorneys ill here were called in conf were present at this conference John B Kerr, representing the Ontario and Western company; Joseph O'Brien and John T. Lenahan, the non-union side: Mr. Darrow and James L. Lenahan, the miners; Everett Warren, the Pennsylvania Coal Company; the Hillside Coal and Iron Company and the Lackawanna company; I. H. Burns, the independent operators; David Willcox, the

Delaware and Hudson company. There was at this conference an expres sion of opinion, one way or another from all of the attorneys, with regard to a policy of conciliation and mutual concessions that would lead to a settlement out of court, but all spoke with exceeding caution. The most cautious of all was Mr. Darrow, who said that he saw no reason why the troubles night not be adjusted if the parties concerned approached the matter in a proper spirit. There was no formal response to this and then the Commissioners went on to give their attitude toward settlement over

Before adjournment 1. H. Burns, repre-senting the independent operators, reite-rated the statement that he had made before the full commission in the morning, to the effect that the companies that he repreeffect that the companies that he represented did not propose to be frozen out of any negotiations looking to a settlement that may be considered. Mr. Darrow for the miners assured Mr. Burns that he would not be willing to a cept any terms of a settlement that did not include an agreement with the independent companies. The conference them adjourned.

Following the adjournment of the conference then adjournment of the conference there was a breezy exchange of ideas between Mr. Darrow of counsel for the miners and Mr. Crawford of the independent operators, the head of the famous people's comman, that cleaned People's company, that cleaned up a saus little fortune by operating his mine through-out the greater part of the strike and securing tremendous prices for the product.

Mr. Crawford was of the firm impression

Mr. Darrow, without losing his temper, attempted to point out to Mr. Crawford that as the representative of the miners he would consider no settlement complete that would not have the adherence of the independent, companies, Mr. Crawford,

independent companies. Mr. Crawford, however, remained unconvinced. The independent men are principally conerned over the non-union men they have in their employ. With Mr. Crawford, for instance, more than three-fifths of the men in his employ are non-union and he does not feel willing to listen to any proposition for a settlement that will in any way disturb these non-unionists in the easy places that they now hold about the miner.

MURDERER CAUGHT IN LONDON. Police There Think He Has Committee Many Crimes in America. Special Cable Despatch to THE SUN.

LONDON, Nov. 22 .- A man who gave the name of George Stone was arrested in London this afternoon on the nominal charge of murdering a negro in Chicago in 1893. It is believed that Stone's real name is George Withyman.

Stone was arrested in a low cook show in Blackwall called the "Tunnel Coffee House," where he has been employed. He has been in London since last March. The police believe he has been connected with several murders in the United States especially in Galveston, Tex., where he worked on a railroad.

When he was arrested by Inspector Forest of Scotland Yard on the charge of murder he asked: "Is it for a nigger or a white man?" When the inspector told him it was for the murder of a negro, he appeared to be relieved. He said the negro referred to had called him a vile name. Stone replied by calling the negro a vile name. Then the negro drew a knife and Stone ran upstairs for his gun. The negro followed and Stone shot him.

SCARE OVER ROOSEVELT.

FORTY-TWO PAGES.

Officials Spring to Protect Him From Rough-Appearing Man. PHILADELPHIA, Nov. 22.- The only un

pleasant feature of President Roosevelt's visit here to-day was an incident after the reception to the President in the afternoon. A man of apparently foreign birth and roughly dressed, darted under the ropes along the curb and made for the President's carriage with his right hand in his pocket.

The Secret Service agent on the seat of the President's carriage tried to jump off to intercept the man, but the driver and the reins were in the way. The most he could do was to climb over the seat and interpose his body between the President and the approaching man.

Meanwhile Secretary Cortelyou, in response to the cries of the detective to stop the man, had already completely covered the President with his body. The man who made all the trouble threw both hands in the air when he saw what a commotion he had made and shouted:

"I only want to shake hands." The President rose and calmly shook

hands with him. In the disturbance a negro also got through the lines and seized the President's hand and kissed it before he could be stopped. Secret Service officials received warnings several weeks ago that there was a mysterious plot against the President in Philadelphia on the occasion of this visit. The detectives were all worked up to a high pitch of excitement.

GLASS A TOWER OF STRENGTH

The Big Blue Rushline Proves Irresistible.

Two Touchdowns in Each Half, One Due to a Sixty-five-Yard Run by Metealf Thirty Thousand Persons See the Contest Which Brings Champtonship to Yale-Ells Open Up Gaping Holes in the Crimson Ranks and Their Swift Plans-Victors Make a Total of 458 Vards, With 103 for the Cambridge Eleven. Which Is Outclassed-Chadwick's Players the Stronger and Improve as Conflict Progresses-Good Feeling Between Rival Partisons and Some Rough Play on the Field.

NEW HAVEN, Nov. 22-Outplayed at very point, Harvard University's football eleven went down to defeat on Yale Field this afternoon by a score of 23 to 0. The result was entirely unexpected, so far as the thousands of Harvard men and women who gathered in the great stands had been led to believe that their team surely would win. In fact, there was so much Harvard

thousands of dollars brought here from Boston and Cambridge were wagered against Yale money at odds of 10 to 6 on Yale. Yale men, however, took all the money they could find, and to-night they are burning it up in the public houses and in other ways.

Yale's eleven proved vastly superior to Harvard's in every way. The Yale rush line was not only impregnable in defence, but the forwards played such a fierce, aggressive game when Harvard was trying to make ground that the Cambridge formations were battered to pieces

ball was dragged backward for a loss. In these operations the gigantic Glass proved a tower of strength. He opened up holes in Harvard's line through which the Yale backs were tossed again and again, while in broken fields the Syracuse wonder did some phenomenal tackling which made the Harvard players look upon him in

amazement. Glass's performance showed conclusively that if he had been disqualified on the alleged charge of professionalism Yale's team'would have been weakened materially. for the big man not only played a remarkable game himself, but his ginger filled the others with snap and dash, which, by the was Vale's chief characteris start to finish. When Glass was not in the thick of the fray, Goss, Kinney, Hogan ard Shevlin were. In other words, the entire rush line worked like a charm, there being few mistakes and a concentration of action that soon spread consternation in Harvard's

ranks.

Coupled with Yale's great line were her swiftly moving backs, who cut the Cambridge defence into ribbons time and again. and gained ground until the thing became monotonous. Football experts who had in mind Yale teams of years gone by said to-night that this eleven was equal to the strongest ever turned out at Yale Field and was entitled to the intercollegiate championship beyond the question of a doubt. Yale's first touchdown was made after nine minutes of play through a series of short, sharp, brilliant attacks directed at both wings, which culminated in Chadwick, the Yale captain, taking the ball over the line for a score. Had it not been for a muffed punt by Kernan, the Harvard captain, near the middle of the field, this assault probably would have been deferred for some time. But when Rockwell made quarter back kick and Kernan dropped the ball out of his arms, Yale was in a position to drive right down the chalk lines to the objective point. Bowman kicked the goal. as he did one other later on, with consummate ease. Yale's second touchdown was made not long afterward, when Metcalf was thrown through a hole in the Harvard line made by Glass and ran sixty-five yards down the field for a touchdown, dodging the only Harvard tackler, C. Marshall, with ridiculous ease. This play was identical with the two made by Yale against Princeton a week ago, when holes were made in the Tiger's lines and Chadwick was hurled bodily through them to places where, barring the presence of a single opponent

he had a clear field. Yale is the only college team this ear that has perfected this particular play so that it has turned out to be practical unstoppable. Many have contended that there must be holding in the line in order to make the holes for the runner. But to close observers to-day it appeared that it was simply a case of opening up the line in the good old-fashione I way, although it was done by men who stand head and shoulers above any centra trio in America at the present time. Glass and Goss worked in superb harmony with Holt in this respect and Harvard's guards, together with the

centre, were like chaff before the wind. With the score 12 to 0 at the end of the first half, Harvard's chances for winning were anything but bright, and no sooner had the second half started than it was apparent to every impartial spectator that the Crimson eleven was sadly outclassed. Yale's play in every respect improved in a marked degree, the formations being more effective than in the first half and the whole combination working with a ficreeness and at the same time a smoothness that

made Harvard look decidedly amateurish. Yale's third touchdown was the result of plain, everyday, battering-ram tactics, which followed several fairly good runs produced by holes in the line. Chadwick made the third score and Metcalf kicked the goal. The last touchdown was the result of similar tactics with a goal failure,
